

# IT Asset Manager

**ONE SEAMLESS SYSTEM  
FOR COMPLETE IT CONTROL**

Modern school districts depend on thousands of devices, but keeping tabs on them doesn't have to be complicated. Follett Software's IT Asset Manager helps you track, manage, and maintain every device from deployment to retirement, all from one central system.

## Key Benefits

### Improve accountability.

Gain district-wide visibility of every asset: who has it, where it is, and what condition it's in.

### Streamline support.

Built-in ticketing with full asset context helps technicians resolve issues faster and avoid duplicate work.

### Reduce loss and waste.

Districts that implement IT asset management programs, including barcode scanning and accountability workflows, report a **20 to 30% reduction in lost or misplaced devices** (Securely K-12 Device Management Survey, 2023).

## Key Features

- Barcode scanning
- Integrated help desk
- Preventative maintenance scheduling
- Mobile app access
- Asset check-in/checkout
- Student and staff accountability
- Audit reporting and inventory tools
- Centralized dashboard views

### Lower maintenance costs.

Preventative maintenance and parts tracking help reduce emergency repairs and avoid duplicate purchases. Research shows districts can see up to **30% lower maintenance costs** with a proactive asset management approach (IBM ITAM ROI Study, 2023).

### Enable on-site service.

Mobile access allows technicians to retrieve asset data and resolve issues without returning to a central office. This reduces travel time and improves service response.

### Built for K-12 Technology Leaders

Designed to support 1:1 device initiatives, simplify audits, and reduce IT burden, IT Asset Manager helps technology teams deliver better service with fewer resources.

### Let's talk.
