

ROI CALCULATOR · SEE YOUR NUMBER

You Are Budgeting to Buy What You Already Own.

See how much your district could reclaim, in two minutes.

YOUR HIDDEN BUDGET, MADE VISIBLE

YOUR NUMBER

The calculator personalizes the estimate to your district. Illustrative, not a guarantee.

2 MINUTES
to see your estimate

3 INPUTS
district size · materials · annual loss

1

THE PROBLEM

District budgets still start with one question: what do we need to buy? But a real share of next year's spend goes to textbooks, instructional materials, equipment, and kits the district already owns but cannot see. Unseen surplus gets reordered every year.

2

THE SOLUTION

The calculator turns hidden surplus into a district-specific estimate. Your inputs, your number, and it costs nothing to find out. For Follett Destiny® customers, Destiny Resource Manager extends the Destiny platform they already use to track instructional and curriculum assets beyond the library. No new implementation.

3

THE URGENCY

Reorder decisions run on a calendar. Once the purchase order goes out, this year's hidden budget is money you cannot get back. Run the number before you plan the next order, not after.

Why districts trust the number

\$20K+

Reported savings at Santa Ana Unified by consolidating textbooks already owned

250K

Resources managed by two people at St. Mary's County

100%

Textbook collection rate reported by an unnamed district using Destiny Resource Manager reporting.

Run your number in two minutes

See your district estimate, then schedule a 30-minute resource visibility review.
